“Can you tell me what my mama’s cells really did?” he whispered. “I know they did something important, but nobody tells us nothing.” p. 250

The Immortal Life of Henrietta Lacks

- Henrietta’s cells or HeLa cells pioneered great scientific and medical discovery such as treatments for cancer, polio, influenza, and AIDS
- Her story highlights the role of race in medicine and the importance of patient rights and medical ethics

If you would like to be apart of our Book Club fill out the form below to be included in Bi-Weekly discussions, concerning each part of the book.

[Form Link](#)

Meetings are every other Wednesday at 6pm and a newsletter containing discussion question will be sent a week and half prior.

First meeting will be July 22nd at 6 pm focused on introductions and preliminary book discussion.

Below are two (non-exhaustive) ways to obtain this book:

- Download the OverDrive or Libby app to borrow the book from your local library
- You can purchase the book from local Black owned book stores such as “Frugal Bookstore” in Roxbury
