

2026 NANOscientific Symposium Americas

September 29-30, 2026 | EXP, Northeastern University, Boston, MA, USA

Join us for the NANOscientific Symposium Americas 2026, taking place **September 29 at EXP Northeastern University and September 30 at Northeastern University's Innovation Campus in Burlington, MA**. NSS Americas 2026 brings together research, instrumentation, and collaborative frameworks to advance developments in nanoscale discovery.

September 29 (Day 1)

In-person event with live online streaming, featuring high-level speakers and technical talks.

September 30 (Day 2)

Live, hands-on tooltraining with **Park Systems Atomic Force Microscopes, the Accurion EP4 Imaging Spectroscopic Ellipsometer, and Lyncee Tec's Digital Holographic Microscope.**

Featured Program Topics

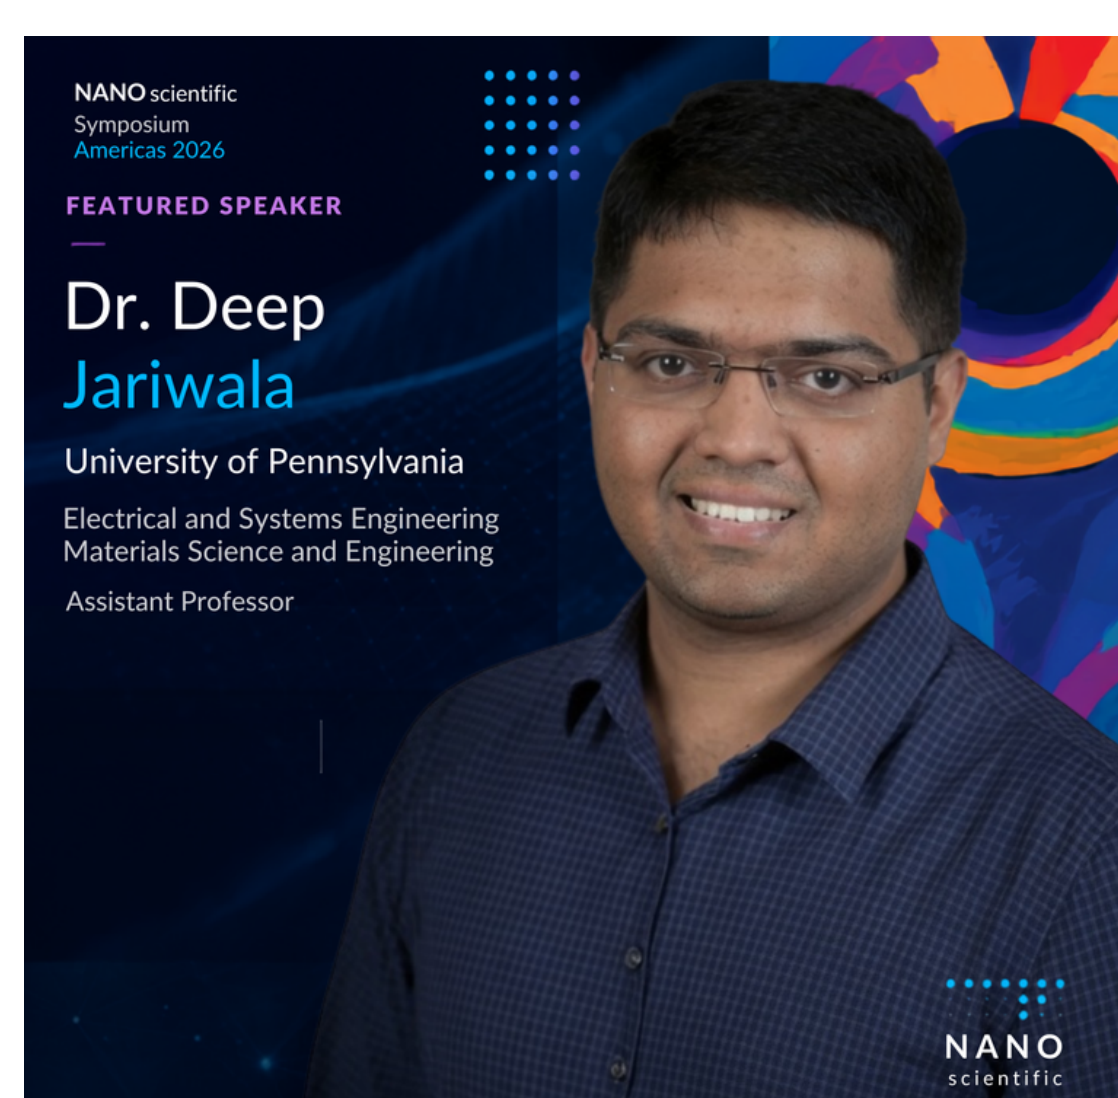

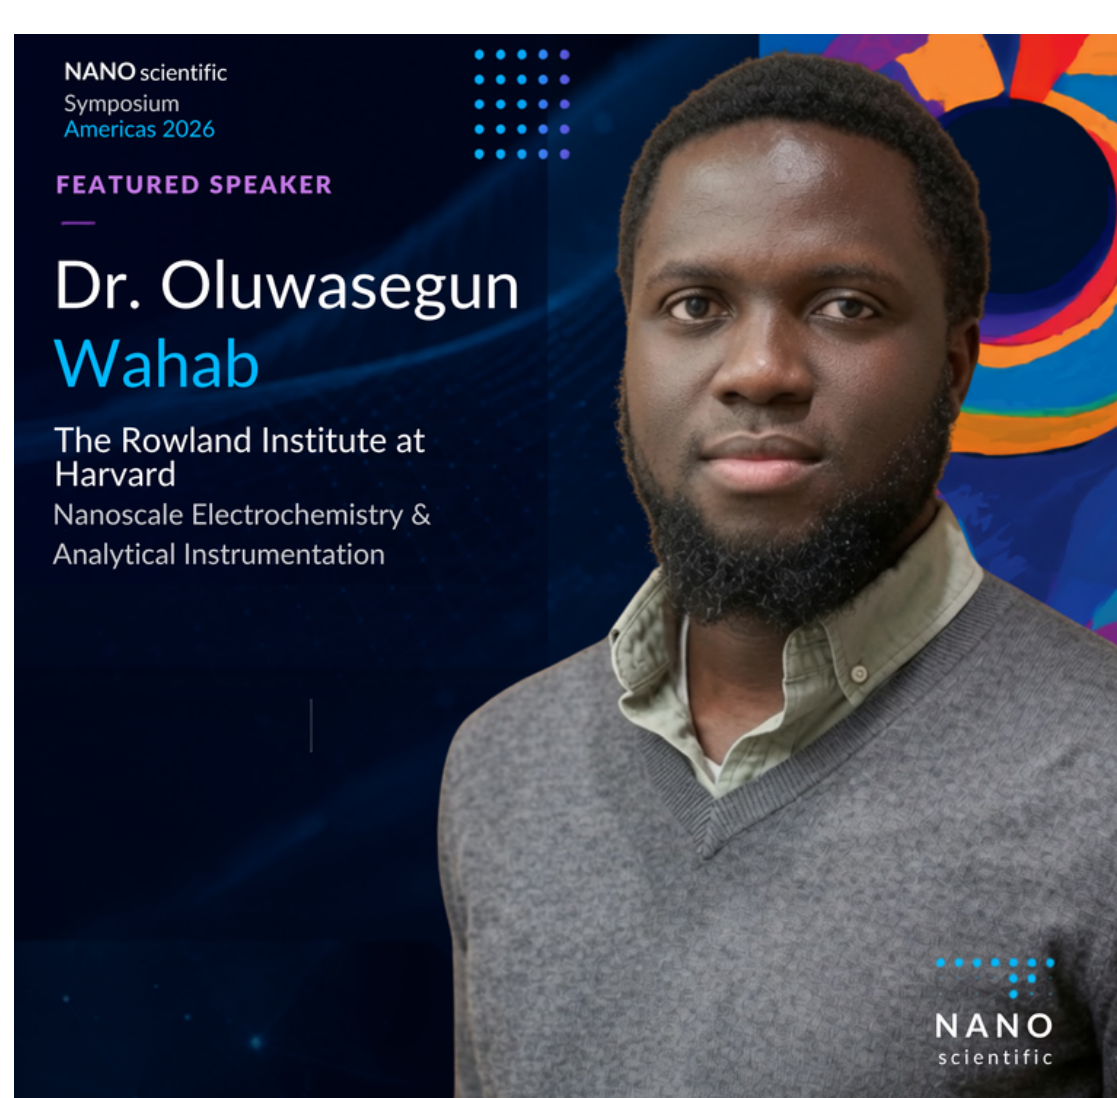

- Atomic Force Microscopy (AFM)
- Correlative and Multimodal Imaging
- Surface and Thin Film Characterization
- Semiconductor Failure Analysis
- 2D Materials and Quantum Applications
- Electrochemistry and Energy Materials
- Advanced Optical Metrology
