

## **V35 Course Section Guidance**

The video streaming (V35) course sections are currently open only to part-time graduate students. Full-time graduate students will face a 'student attribute restriction' when they try to register. If the course is only offered in a video streaming (V35) modality, registration may be permitted even when there is a restriction. However, this is at the discretion of the applicable academic department.

If you wish to request registration for a restricted V35 section, you will need to submit a "Registration Override Request Form" located on the Graduate Forms page. The course instructor should be listed as the first approver; the program contact should be the second approver and the COE Graduate Advising team should be the final approver.

Please note international students will still need to adhere to all OGS requirements to remain within visa compliance.
