

Fall 2025 Course Registration Information: PhD Bioengineering

Congratulations on your acceptance to Northeastern University!

Currently, we suggest that you register for Fall 2025 courses. Before registering for classes, please make sure to watch registration instructional videos at [this link](#).

The Student Hub is the portal for course registration - this can be accessed at [this link](#).

To be able to register for classes, admitted students need to first confirm their enrollment and pay their enrollment deposit. Students may do so by logging into their [application portal](#).

PhD Bioengineering Curriculum

Please review the [Course Catalog](#) for more information on your academic curriculum, and the [Bioengineering Graduate Handbook](#) for full program information and suggested electives for each research area.

If you are entering the program with an MS degree in a relevant field, please refer to the Advanced Entry tab. Core courses BIOE 6200 and BIOE 7000 are required for both PhD and PhD Advanced Entry students.

Fall 2025 courses are available to view at [this link](#).

When searching for courses at the above link, please make sure to select “**Fall 2025**” for the term, “Bioengineering” for subject, and “Graduate” for course level. Full-time students must register for at least two courses, 8 Semester Hours (SH), and part-time students must register for at least one course. If you are full-time and enrolled in less than 8 SH, to maintain your full-time status you must enroll in BIOE 9986 Research, 0 SH, under your faculty research advisor.

What courses should I enroll in?

You should enroll in either one relevant 5000-level course and BIOE 6100 Medical Physiology, or two relevant 5000-level courses.

In the Spring, you should enroll in BIOE 7000 Principles of Bioengineering and BIOE 6200 Mathematical Methods for Bioengineering, as these courses are only offered in the Spring semester. If you have previously taken an equivalent graduate-level mathematics course, you may submit a request to the department to review waiving the BIOE 6200 course requirement.

Additional Information

- Students will be able to easily add or drop courses using the online registration system for the first two weeks of the term. If you have any questions or difficulties with the above instructions, we will be able to assist you upon your arrival.

- The BioE Department Graduate Orientation will take place on September 2, 2025. The agenda and further details will be sent out closer to the time.

Billing

Once you register for courses, you will receive a tuition bill for \$15,525, the NU Student Health Plan (NUSHP), and other mandatory student fees, but there is no action required from you for the tuition and NUSHP.

Your award will cover the tuition and NUSHP fees, as detailed in your offer letters (note this may not appear on your billing statement until several weeks into the semester). You will be responsible for all other fees incurred (not tuition and NUSHP) and you should pay for these as soon as possible. You will still get billing notices as these are automatically generated, but you do not need to respond to these.

If you have questions about payment, please contact c.pridmore@northeastern.edu, coe-phd-gradadvising@northeastern.edu or the [Student Financial Services office directly by submitting an inquiry](#).

If you have any specific questions for the Bioengineering Department, please contact the department Assistant Director of Academic Programs, Caroline Pridmore at c.pridmore@northeastern.edu.

We wish you all the best and look forward to working with you!

Sincerely,

The Bioengineering Department and Graduate School of Engineering
