

Northeastern University

College of Engineering

Congratulations on your acceptance to the MS in Cyber-Physical Systems program in the Graduate School of Engineering at Northeastern University!

As an incoming Fall 2025 student, there are some steps that you need to take before the Fall semester starts. Please read this document thoroughly as it contains helpful information and can answer many of your questions before you start your first semester in your master's program. This document includes two sections, the first section contains important instructions and information for course registration. The second section contains *Frequently Asked Questions* (FAQs).

1. Course Registration

Step 1: Confirm your Enrollment

Please confirm your enrollment at Northeastern University. You will not be able to register for classes until you confirm enrollment. To confirm your enrollment, log into your [electronic application account](#) and pay the enrollment deposit. If you have any trouble, please contact Graduate Admissions at coe-gradadmissions@northeastern.edu.

Step 2: Know your faculty and administrative advisors

As a student in the *Cyber-Physical Systems* (CYPS) program, you have a team of faculty and staff to assist you in your academic career in the Graduate School of Engineering. You will meet these faculty and staff members during your orientation and can ask them questions during your Program Orientation:

Rolando Herrero

Program Director and Faculty Advisor, Cyber-Physical Systems

Colin Dykes

Assistant Director, Academic Advising, College of Engineering

Himadri Dave

COE Career Services and Co-Op Advisor, Cyber-Physical Systems

Step 3: Course Registration

An important part of your first term is registering for the right classes. Professor Rolando Herrero advises students to take TELE 6510: Fundamentals of the Internet of Things and INFO 5100: Application Engineering Development (substitute for CSYE 6200), in your first term for a total of

two 4-credit classes. During your first semester, you will not be permitted to register for more than two academic courses unless you have spoken with Professor Herrero and received his permission to take three 4-credit courses in your first semester. Seats fill up quickly, so please register as soon as possible to ensure you have a seat on the course.

TELE 6510: Fundamentals of the Internet of Things (4 credits)

Please register for the following section (CRN refers to a specific section of TELE 6510): CRN 17760

and

INFO 5100: Application Engineering Development (4 credits)

Please register for the following section: CRN 17618 or CRN 17619

INFO 5101: Lab for INFO 5100 (0 credits)

Please register for the following section: CRN 17632 (for CRN 17618 above) or CRN 17633 (for CRN 17619 above)

We advise Full Time students to register for two 4-credit courses and Part Time students to register for at least one 4-credit course. Please make sure to register for courses as soon as possible to ensure you have a seat in the course.

2. FAQs

How do I register for classes?

Visit the Office of the Registrar's [Registration Experience](#) webpage to learn how to search and register for courses using your MyNortheastern account.

Please refer to the following subject codes when searching for courses:

TELE – Telecommunication/Cyber-Physical Systems

CSYE – Computer Systems Engineering

INFO – Information Systems Program

The online registration system will allow you to add or drop courses. If you have any questions or difficulties with course registration, please email coe-toronto-gradadvising@northeastern.edu.

Do I need to attend both the Graduate School of Engineering General Orientation and Program/ Department-Specific Orientation? What is the difference between these two orientations?

Please make sure to attend both. These are two entirely different orientations and will provide you with information you need in order to succeed. These sessions provide an opportunity not only to get your questions answered but also to meet with your academic and co-op advisors.

What if I have questions regarding choosing courses or course registration?

You will have the opportunity to meet with your Faculty Advisor and Co-Op team during your Program Orientation. Please wait until you have attended the Program Orientation to have these questions answered.

Many of your registration questions will be addressed in the Graduate School of Engineering orientation session. If you encounter any issues or errors when trying to register, please feel free to email coe-toronto-gradadvising@northeastern.edu.

What if my course is full?

Don't panic! First of all, we will ensure that all new incoming students will have the opportunity to take the required courses in your first semester. Second, enrollments are always shifting as students get co-ops or change their course registrations. If a seat isn't available in your preferred classes right away, you can join the waitlist. To join a waitlist, enter the class CRN (the 5 numbers in parentheses next to the course number above) directly into your registration sheet and hit submit. You will then have an option to select "waitlist" from a drop-down menu. The waitlist system will automatically inform you when a seat opens up - just log into your account and accept it within the 24-hour time limit! If you are still unable to register for the course, please email coe-toronto-gradadvising@northeastern.edu for assistance. For all other questions, please wait until you attend the orientation.

How do I register for the Co-Op course?

One of the requirements to becoming eligible to go on Co-Op is to take ENCP 6000, Career Management for Engineers, a one credit course that you take in addition to the 32 credit Cyber-Physical Systems program for a total of 33 credits. This course is available in both the Fall and Spring terms.

If you would like to learn more about the Cooperative Education program, much more information will be presented to you during your Program Orientation, so please feel free to wait until that time to decide regarding registration.

Will I get a bill by registering for courses?

Yes, your first e-bill is generated when you register for your courses. You will receive an e-bill from the University with instructions on how to pay the e-bill. If you have questions about payment, please refer to the [Billing & Payments](#) webpage of the Student Financial Services office.

How do I get a MyNortheastern account?

After you confirm your enrollment, you will be able to log in to your [MyNortheastern portal](#). If you have not set up your MyNortheastern account, log in to your [electronic application account](#) and look for instructions to do so.

Am I required to bring a laptop?

Yes. You should bring a high-quality laptop with a minimum of 8 GB memory AND a strong (4 hour) battery life. Telecommunication Networks students are advised to bring a computer with an *Intel processor* to campus. Otherwise, they are likely to have difficulty running virtualization software on their computer. This is a particular problem with some of the newer Apple computers.

What if I have another question that is not answered here?

Please save any additional questions for the Graduate School of Engineering Orientation and Program Orientation sessions.

We look forward to welcoming you to the Graduate School of Engineering!
