Congratulations on your acceptance to the Master of Science (MS) Information Systems program at Northeastern University’s Graduate School of Engineering!

As an incoming Full Summer 2021 student, there are some steps that you need to take before the Summer semester starts. **Please read this document thoroughly as it contains helpful information and can answer many of your questions before you start your first semester in your master’s program.**

**Step 1: Confirm your enrollment.**
You will not be able to register for classes (information below) until you confirm enrollment. You can confirm your enrollment by logging into your application account and paying the enrollment deposit. If you have any questions regarding this process, please reach out to the Graduate Admissions team. You may contact them at coe-gradadmissions@northeastern.edu.

**Step 2: Know your faculty advisor and administrative contacts.**

- **Professor Kal Bugrara**
  Program Director, Information Systems

- Sam Casey, Program Manager
  s.casey@northeastern.edu

- Yalan Sun, Program Manager
  y.sun@northeastern.edu

- Erin Macri, Administrative Assistant
  er.macri@northeastern.edu

**Step 3: Complete your course registration.**
As an Information Systems student, you are required to complete INFO 5100: Application Engineering Development and the accompanying lab, INFO 5101: Lab for INFO 5100, in your first term. This is the only required course in the Information Systems program and it is an important building block for your subsequent courses. Your second course will be the first elective course in your program. We have four different elective options for our first-year students that will help you develop the skills you will need to be successful throughout the rest of your program. It is strongly recommended that you take one of the four elective courses listed below in addition to INFO 5100 and INFO 5101, as some of these courses are prerequisites to other courses that will be offered in following semesters.
Professor Bugrara has created the following advising guide for you to refer to as you choose your courses for this Summer. Please note that any class times listed means the class will have a synchronous lecture at that time, in addition to a recorded lecture.

**INFO 5100 (required): Application Engineering and Development**
Students will learn innovative software programming techniques that will enable them to design and build any kind of application properly and quickly. Through hands-on weekly lab sessions, students practice the development of applications as an assembly of components. Object-oriented techniques for building business architectures that map to software applications will be introduced. You will learn how to master ways of taking vague requirements and turn them into systems of ecosystem scale. This class was designed to meet the needs of engineering students with a limited programming background. Students who do have a programming background will learn how to design and architect software the right way. This class with its emphasis on solid design of socio-technical systems is the corner stone of what we do in Information Systems.

**Sections Available:**
- **Section 01:** Thursday 8:00 - 11:30 AM  
  CRN 51759 (Traditional, Full Summer)

**INFO 5101 (required): Lab for INFO 5100**
This is a required two-hour class session is complementary to the main lectures of INFO 5100. The lab will cover the syntax and semantics of programming in the Java programming language. The teacher will emphasize all aspects of the Java programming language in depth to ensure students are ready to tackle complex problems. The lab will be especially useful for students with minimum programming background.

**Sections Available:**
- **Section 02:** Sunday 1:00 – 4:00 PM  
  CRN 51763 (Traditional, Full Summer)

**INFO 6150: Web Design and User Experience Engineering**
This course gets into the front-end design of web-based user interfaces using Javascript. You learn the latest tools, techniques, and frameworks for building attractive user interfaces that engage the user in meaningful ways. You’ll learn about various ways that users interact with systems,
color theory, and how to implement solid client-side user interfaces. Meant for students with minimal programming background but ready to program in Javascript and html. This class goes well with the Application Engineering class (INFO 5100). These two classes will prepare you well for becoming a front-end developer. Tools covered include Javascript, Typescript, AngularJS, Node, and various aspects of the React framework. This is a popular course that we recommend highly due to its relevance to co-op job opportunities.

**Sections Available:**
Section 01: Wednesday 6:00 - 9:30 PM
CRN 51214 (Traditional, Full Summer)

**INFO 6205: Program Structure and Algorithms**
This class is recommended for students who have had programming experience before, but lack the algorithmic approach to solving complex programming challenges. The class covers all kinds of data structures from stacks, queues, trees, graphs, and algorithmic performance complexity. In addition, the class covers various problem-solving techniques such as divide and conquer, dynamic programming, randomized and greedy algorithms, backtracking search, etc. After the completion of this class, you will be in a position of solve any programming problems. Though this class is optional, it is highly recommended for students aiming to be software developers. There is a lot of technical work involved here, so it will be a challenge along with the Application Engineering class (INFO 5100). Students with a strong technical background may wish to take up this challenging opportunity right away.

**Sections Available:**
Section 01: Wednesday 1:30 – 5:00 PM
CRN 50494 (Traditional, Full Summer)

**INFO 6210: Data Management and Database Design**
For the student who has no background in databases and wants to know what is involved in the design and programming of databases and wants to maximize technical skills. A good foundation for those who want to focus on data management, business intelligence, data science, etc. or who want to make these areas their career objectives. This class will prepare you well for Web Methods and Tools in future semesters.

**Sections Available:**
Section 01: ONLINE (Full Summer)
CRN 50409

CSYE 6200: Concepts of Object-Oriented Design
This class will focus on the ins-and-outs of the Java programming language. Students who have not programmed before will be asked to take this class in addition to Application Engineering (INFO 5100). The combination of these two courses is an excellent way for students to strengthen their development skills in preparation for the heavily programming courses such as the Algorithms, Web Methods and Tools, Big-Data Engineering classes during the Fall semester.

Sections Available:
Section 02: Friday 6:00 - 9:30 PM
CRN 51753 (Traditional, Full Summer)

Frequently Asked Questions

How do I register?
Please enter the CRN numbers listed above directly into your registration worksheet. Some sections may not be available to view online as they are reserved for first-term students only. You will not be able to register for these classes using the search classes feature and MUST enter the CRNs directly. If you need help navigating to your registration worksheet on your my.Northeastern account please watch the following webinar for instructions on how to register using your my.Northeastern account:
General Registration Instructions

What if I already registered for classes?
Please drop them immediately--unless they are the courses listed above. As a first-term student, you should only take the sections of the classes listed above.

What if I do not get the elective I wanted?
If your first preference does not have any seats available, please sign up for your second preference (and so on). The schedule is dynamic, and students will continue to change their registrations up until the start of the term so there is still an opportunity for you to get into your first-choice elective this Summer. Please make sure you are always registered for 8 SH if you are a full-time student.

Can I take an elective other than the seven listed above?
No. These classes were chosen because they are appropriate for first-term students. Please refer to the advising guide to select the class most relevant to your interests.

**How do I meet with Professor Bugrara?**
You will have an opportunity to meet with Professor Bugrara, the Director of the Information Systems program, at orientation before classes start.

**Can I skip the Application Engineering class (INFO 5100) or take it in a later semester?**
No, you must take INFO 5100 this Summer. The class is essential for advancing yourself through the program and engaging in a successful co-op experience.

**Am I allowed to take three courses?**
No. Information Systems students are limited to two courses each term. Based on feedback from our students, we found that three courses were too demanding, especially in terms of final exams and projects. All courses require projects that count as much as 30% of your final grade and it is extremely hard to complete three of these in one term. **No exceptions to this policy will be considered until after your first year.**

**Can I take courses from other departments?**
The only other department Information Systems (IS) students can take classes from is CSYE (Computer Systems Engineering). CSYE is a sister program to IS and is being repositioned to focus exclusively on big-data technologies and programming platforms. Courses such as Java, multi-threading, managing big-data projects, advanced big-data programming, as well as Scala/Spark programming will be available to IS students after your first term in the program.

**Can I transfer credit from other universities?**
No. Professor Bugrara firmly believes that all 32 SH should be taken within the program at Northeastern University to uphold the integrity and continuity of the program.

**What is the duration of the Information Systems Program?**
You are required to take eight courses for a total of 32 credits. The program takes a minimum of three semesters to complete. The typical student takes 2.5 years to complete the program, which includes an eight-month co-op.

**Is there funding or Teaching Assistant jobs available for first year students?**
Unfortunately, there are no funding options in your first year. TA positions are filled by second year students only. You are expected to be fully dedicated to achieving academic success in the first year of the program.

**Am I required to bring a laptop?**
Yes. You must bring a high-quality laptop with a minimum of 8 GB memory AND a strong (four-hour) battery life. This is **required** for the Application Engineering course.

**Am I eligible for co-op?**
You are not eligible for co-op the first two semesters of your program, during which your focus will be strictly academic. During your last semester of study (in your second year), you must be fully on campus as a full-time student, even if you are eligible to be on co-op. According to government rules and regulations, co-op is an educational opportunity to strengthen your engineering skills—not a job pursuit.

**How do I register for the co-op course?**
One of the requirements to becoming eligible to go on co-op is to take ENCP 6000, Career Management for Engineers. You can register for this course just as you do with your academic courses, but you need to make sure that you register for a section only for IS students. You can see this information in the course description on your registration portal under “Program Restrictions.”

**How long can I go on co-op?**
Co-ops are a minimum of four months and a maximum of eight months.

**Will I get a bill from registering?**
Yes, your first e-bill is generated when you register for your courses. You will receive an e-bill from the University with instructions on how to pay the e-bill. If you have questions about payment, please contact the Student Financial Services office directly: [http://www.northeastern.edu/financialaid/contact/](http://www.northeastern.edu/financialaid/contact/).

**How do I get a my.Northeastern account?**
If you have not set up your my.Northeastern account, please follow the instructions [here](#).

For more information about beginning your program at Northeastern University, please read your acceptance letter in full.

*We look forward to welcoming you to the Graduate School of Engineering!*
