

ENCP 6000 Career Management Registration Guidance

ENCP 6000: Career Management for Engineers is a pre-requisite to participate in the COE MGEN Co-op program and to obtain access to Northeastern's co-op job platform NUworks, to search for co-op positions. Please visit the [COE Multidisciplinary Masters Co-op Students website](#) for complete eligibility requirements, co-op planning timeline, and more.

The ENCP 6000 course is offered to all MGEN students. Please use the chart below to find your relevant program and choose a section that fits your schedule. Registering as soon as possible is recommended to ensure you secure your seat in the class. *You must enroll in a section in your program.*

There are two circumstances in which a student may request a waiver from ENCP 6000. You may submit a COE-MGEN ENCP 6000 Waiver Request if you meet one of these criteria. Registering for a class section is highly recommended until you receive a response to your waiver request.

1. Completed an equivalent course at another US-based institution of higher learning and received a grade of B or higher, OR
2. In the process of completing a graduate program at Northeastern University, outside the College of Engineering, and received a grade of B or higher in their Introduction to Cooperative Education course.

If you are an MSIS Bridge student, you cannot take ENCP6000 in the first semester; you must complete INFO 5001 and INFO 6215 before taking Co-op Class.
